

EDGAR YEGHIAZARYAN

FRONT-END DEVELOPER

SUMMARY

I'm a passionate front-end developer with a strong focus on React.js and Tailwind CSS. I love crafting responsive web applications that provide intuitive user experiences. I also have some back-end experience with Node.js and Express.js, which helps me integrate smoothly with server-side components. I'm excited to work with collaborative teams and contribute to projects that really make a difference.

PROJECTS

INFORMATIVE MOVIES PLATFORM

- The platform allows users to register, make users as admin, watch, review, navigate, and get information about movies. Admins can implement CRUD operations for movies, genres, actors, and cinemas.
- Frameworks and libraries: React.js, Leaflet, Axios, Bootstrap, Formik & Yup, Sweetalert2, TypeScript, React-Markdown, React-Router-Dom.

ECOMMERCE WEB APPLICATION

- Developed an eCommerce web application that allows users to search and filter products, register and log in, reset their forgotten passwords, manage their shopping carts (add, update, and remove products), and, for admin users, add and edit product listings with images. Focused on creating a responsive and user-friendly interface, ensuring a seamless shopping experience across all devices.
- Frameworks and libraries: React.js, React-Router-Dom, Tailwind CSS, Node.js, Express.js, MongoDB
